This game is pretty fun :D

I had great time playing it.

Myb. If you let people play more that 50 years,becose it will be more fun to have more stuf and etc.

For me it is 7.5/10

Becose i didnt had a lot to do.Anyways i recommend this game.

Great Job Developer :D

Video : <https://youtu.be/igFGndrTirg>. I love HOGs, but I'm not sure if I will finish this game... (For me, that's like saying I'm not sure I'm going to finish a book; it's almost sacrilegious.) It is a cool looking game, but I'm spending as much time b\*tching at it as I am playing it. The HOGs are having some issues such as: not recognizing the correct item (try clicking several times and around the item), bad naming ("clutch" is apparently a C-clamp), and multiples of a named item in a scene, but only one is correct. Some of the puzzles so far are intuitive. Some, I have no idea WTH I'm supposed to do. NO instructions on the puzzles, even in Casual mode with tutorials open (because I thought maybe I missed something). I really dislike having to look at a strategy guide, not to SOLVE a puzzle, but just to figure out what you are supposed to do. Also, the having an appropriate tool in your inventory that will work, but it's not the "right" tool, is irritating. So, I will put it aside for now and play something else. Maybe I'll come back to it. IDK.... Horribly translated and boring slow pace, not worth any price.. Game is dead :( Tried playing online with buddies.

The online hub was horrid.

Game constantly lags oh.. an did i mention the whole game freezes beyond saving if the host dies?. Great game! Looks perfect..Plays perfect! 9V10 for this game so far..This is a game I hope has at least 10 levels when finished and as soon as they can make 10 more levels I will spend another 10\$....and keep on doing that for as long they keep making levels lol...This game brings the VR dreams of the 90s to life!. Loved it! It was awesome to see the story of Jett and Bolt play out after playing through the original SC2VN. I this this a great prequel and really enjoyed all of the characters. Lots of funny moments as well, and the interactive game scenes were a cool addition! Great job!

---

Excellent game. Highly recommend. Graphic quality is good. I am a huge fan about the option where you can skip certain puzzles, as some may become a little tedious. The ending caught me by surprise. Only downside is the short gameplay, just wish they could add some DLC or bring out another.. I really do enjoy these sort of "games" as these stories really add up in the world of story telling, and this world. As this story takes places in the ocean as a mermaid, I don't wanna spoil much what happens more. But I really love the idea of transgender character(s), lesbian lovers or just doing both genders. Or choose you don't give a single\ about love at all.

I would recommend it if you enjoy these sort of stories with a path to choose your own.

It's sure a different twist than some random mermaid story, but very good.

-Little edit-

I wrote this late night, and forgot to add that some things are really forced into the game. As you can't really choose that way and just get pushed into the direction. otherwise it's pretty good only a shame they kinda force some ways.. Still only in the beginning. Graphics have a nice feel to them and story is so far small but intriguing.

\* Update First had problems with my xbox controller. After restarting the game it now detected and configured my wireless xbox controller without problems. Don't know what the issue was. The game is certainly more enjoyable using a controller.

\* Update 02-12 Played a bit more. Game becomes even better as you get better. I want more skulls!. Great game that had a poor Launch. Since launch, its been updated with new weapons and had several bugfixes.

This is a Great game that suits VR very well! It has amazing potential just simply needs more players.

Definitely give this game a buy.. I would really like the game but its too pricy for the state that its in

1 it does not have a option to change the language (the old version has)

2 the turns of the enemys happen too fast i think

3 the tutorial could use a workover

if all of this would be fixed and the game would have a bit more to do

for example a local 2 player mode

than the pricetag would be ok but in this state i think its way too expensive for what it gives .... Basically what you are getting are premade buildings. If you tried to make your own buildings out of the tilesets provided you would be severely limited as there are very few intermediate blocks to allow for extension. The quality is good and they are nice looking tiles that i feel mesh well with the standard tiles but wasn't what i expected.

If you are looking for tiles to make your own buildings this is NOT the dlc for you. If you just want the buildings premade and ready to go, then go ahead and get this dlc. though i recommend getting it on sale. there isn't much to this dlc.. I love the Just Cause franchise. When I played Just Cause 2, I gravitated to the amazing gameplay, and the awesome destruction. Just Cause 3 gave me more amazing gameplay, crisp graphics, great dlc that added on to the game,

a ton of toys, and an environment that feels realistic. When Just Cause 4 was announced, I pressed the preorder button immediately. But when I got the game, I was hella disappointed.

You see, every game, the developers add a really cool gameplay mechanism that changes how we play the game. The problem is that the gameplay mechanism, is nothing more than a gimmick! All we get is just a tornado and grapple hook options. Both don't really change the game.

The one good thing I can say about this game is that the environments and models are so good to look at, I deleted my hentai folder and replaced it with my screenshots of Just Cause 4. But that's the only good thing I can say about this game. Shame on you squareenix. Avalanche, your ok, you just got a huge of feature creep up your developers. Great game to familiarize with VR. Enjoyable and funny.

**. Work in progress: the Attractiveness System:**

Buongiorno fellow chefs!

We keep working on the first major update and it is now time to show you some of the contents we will soon release for Chef! As you may know, we are working on the City Map, a new system that will allow you to extend your influence across the city and slowly gather loyal customers. But to do that, we needed to rework how customers work in the game.

We felt like that the current system wasn't clear enough, we wanted players to have a precise idea of how many people could come to the restaurant with a certain setup. That's why we reworked the existing customers' bars that appear in the Menu Panel and in the Policies Panel.

What's new? Well, let's start with the fact that there will finally be a clear number representing how many people may currently be interested in coming to your restaurant. All those numbers represent the actual pool of customers of the restaurant and the bars have now a different role: they indicate the Attractiveness of the restaurant's offer.

---

While previously the Menu composition directly affected the number of people in the pool, with imprecise effects, now the pool can only be affected by your Popularity and your efforts to reach new districts expanding the influence you have in the city.

It will now be possible to know how many customers will pay a visit during the day, and you will be able to carefully assemble the menu and develop tactics to maximize profits. There will also be a much rewarding progression, since you will have to deal with low-budget customers at the beginning (including the infamous Cheapskates!), and slowly conquer more and more districts to gather enough high-budget customers to finally be able to serve only them in the restaurant!

We are now finishing all mechanics related to the City Map and the player's expansion in it, and we will soon share more info regarding this major update with you! We are also still fixing bugs and minor issues, and all those fixes will be included in the City Map Update!

**. Patch 01 - Changelog:**

The first patch for Chef is out! It solved many different things, but we are not over yet, so expect a new update in the next hours!

We also reduced the initial challenge, balancing some costs.

**Changelog**

- Fixed the save issues with Skill Points. Old save games will be fully compatible, and all skill points spent have been restored!
- Added tutorials to Chef Advisor
- Added tutorials to the Ingredients Panel
- Reduced and balanced the cost of all Policies
- Removed a few Alerts from the tutorial phase, to avoid confusion.
- Staff salaries reduced
- Fixed a minor bug on a restaurant preventing some items to be placed on a single wall
- Game is now fully compatible with 21:9 screens

We are not done yet, expect all major issues to be fixed very soon. Thank you for your support and patience!
